

Cisco Secure Connect

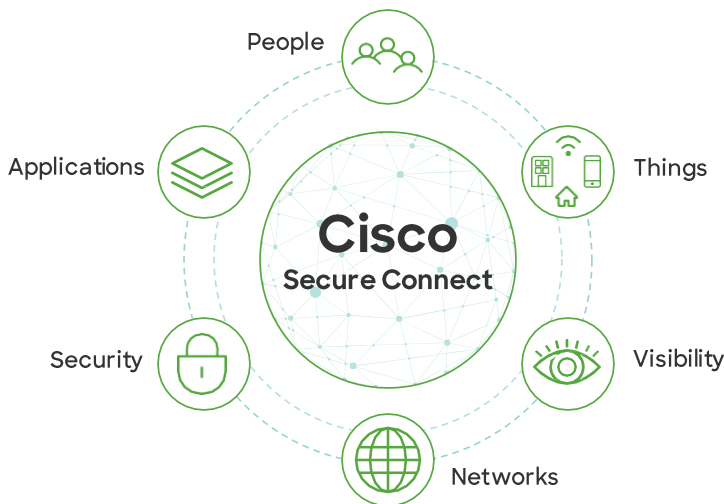

Your blueprint for SASE made easy

Deliver secure and seamless experiences anywhere with a unified SASE solution from Cisco.

Fast-track your journey to greater network and security resiliency with Cisco Secure Connect, a unified SASE solution.

- Provide better protection from threats for your users and your business with continuous visibility
- Secure hybrid work and safely connect users across any point of service
- Deliver an exceptional, unified IT experience that is easy to deploy and operate—without complex engineering
- Easily navigate your SASE journey—all powered within a single platform

Why unified SASE?

Deploy SASE with ease: Drive multiple outcomes for your business by subscribing to a single, unified SASE solution

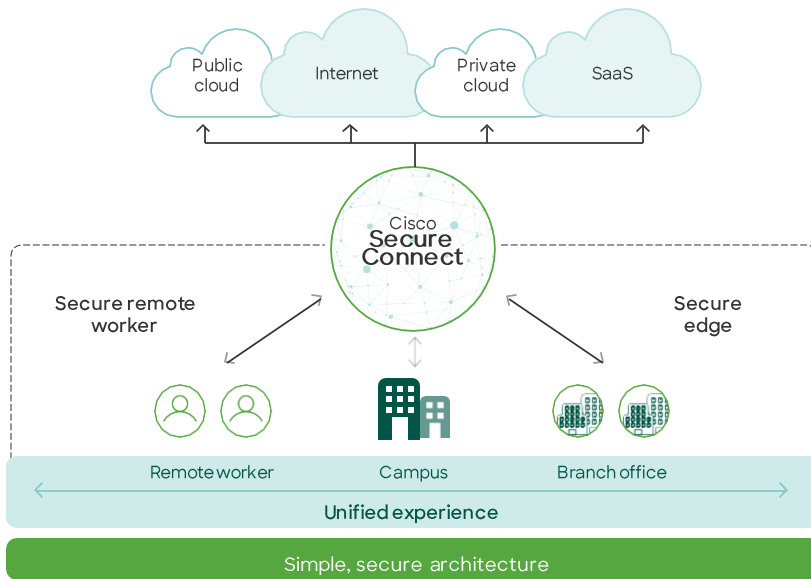

Simplify IT management: Manage network security with an integrated and automated turnkey solution

Optimize network performance: Get the fastest, most reliable secure connectivity enabled by Cisco's next-generation visibility and insights—through a unified dashboard

Enjoy best-in-class security: Confidently protect your users and your network by connecting to industry-leading Cisco Secure Access

Improve branch performance: Continuously optimize application performance by extending SD-WAN to the cloud

Integrate zero-trust access: Validate users for private application access by deploying clientless zero-trust network access (ZTNA)

SASE your way

Finally, a solution that lets you do SASE—your way. Looking to connect remote users? Or perhaps you need branch connectivity? No matter what, we have you covered. Cisco Secure Connect empowers hybrid work by delivering two key SASE use cases for customers:

- **Secure remote worker:** Safely connect remote users to company applications with secure access to the internet, trusted SaaS applications, and private applications
- **Secure edge:** Securely connect branch locations to company applications and resources across the internet, public cloud, and private data centers, and leverage SD-WAN fabric for optimized application experiences across locations

Ready to start building your SASE blueprint?

Our trusted SASE experts are ready to help you get started on your path to a more resilient, secure networking environment. Contact your Cisco Meraki rep today.
